

The ISRI Ti:

The multi-talent for
agricultural machinery

Where work is becoming
increasingly demanding, a
variety of solutions are needed
— all combined in one seat.

ISRI® 
ISRINGHAUSEN

ISRI Ti – the smart all-rounder

Universally applicable – the individual workstation

Increasingly demanding work **requires** a lot from people and equipment. It is therefore essential to use high-quality seating systems that offer comfort, adaptability and safety. The modular ISRI Ti seat family sets new standards in this regard: it impresses with outstanding **ergonomics**, **robust quality**, and a wide range of configuration options that can be tailored precisely to the driver's needs.

With its clear design language, high-quality materials, and precise details, the new generation combines functionality and aesthetics at the highest level. Smart technologies and extensive ergonomic adjustment options underline its high standards.

Winning the Red Dot Award 2024 is a special honor for our new ISRI Ti seat generation and for everyone involved in its development. We are proud of this achievement and see it as an incentive for future projects.

Tobias Lüpfer, Managing Director and COO of ISRINGHAUSEN

red**dot** winner 2024

Maximum comfort through maximum individuality.

The right configuration for every application.

With its compact design, the ISRI Ti offers the best possible cab compatibility and a high level of comfort. Different backrest lengths and cushion widths enable optimal integration into a wide range of equipment classes – from powerful tractors to large harvesters – making the seat a true all-rounder. In addition, the automatic damping adjustment ensures maximum comfort at all times. Thanks to its modular yet compact design, the ISRI Ti can be used flexibly in various cabin types, from cramped to generously sized driver's workstations.

With its adaptability and resilience, the ISRI Ti responds to the ever-increasing demands of the agricultural industry and helps drivers control their machines safely and without fatigue.

ISRI Ti awarded AGR seal of approval for back-friendly products.

The ISRI-CAN-TECH-System

Digital networking for personalized profiles and pioneering functions

- ✓ Simple visual presentation
- ✓ Comfort and ergonomics adapt to the driver using the memory function
- ✓ Maximum flexibility

The seat offers the most advanced CAN bus technology to ensure an optimal adjustment for each driver. When entering the cabin, the driver can switch to their individual seat profile via the vehicle's own control terminal. This technology also enables the seamless integration of future functions to meet evolving requirements.

Memory function

Individual seat position at the touch of a button

The ISRI Ti has a unique memory function that allows the driver to recall the **optimum seat position** easily and precisely **at the touch of a button**. The length, height, backrest, side bolsters and lumbar adjustment can be customized and saved for multiple drivers. This technology is not only a **unique selling feature in the industry**, but also contributes significantly to optimal ergonomics for the driver.

Comfort features

Relaxed, even after long working days

The ISRI Ti can be equipped with seat heating, seat climate control, lumbar and side bolster support as well as a massage function, which raise driving comfort to a new level. These functions help to **relieve the driver**, especially during long and hard working days.
